Herndon, VA | US Citizen

EDUCATION

Georgia Institute of Technology
M.S. in Computer Science

Atlanta, GA
Jan. 2027 – May 2028 (Online)

George Mason University
B.S. in Cybersecurity Engineering | GPA: 3.28

Fairfax, VA
Aug. 2022 – Dec. 2026

CERTIFICATIONS

Palantir Foundry Certified Professional, 2026 | AWS Solutions Architect – Associate, Jul. 2026 | AWS AI Practitioner, Aug. 2026

TECHNICAL SKILLS

- **Languages & Frameworks:** Java, Python, C/C++, JavaScript, SQL, Spring Boot, Flask, REST APIs, HTML/CSS
- **Cloud & DevOps:** AWS (EC2, RDS, S3, VPC, IAM, Lambda, CloudWatch), Docker, GitHub Actions, CI/CD, Nginx, Linux
- **AI & Data Platforms:** Palantir Foundry, AIP, AIP Assist, Pipeline Builder/FDE, Ontology, Workshop, Logic
- **Software & Data:** Git/GitHub, Unit Testing, OOP, MySQL, PostgreSQL, SQLite, Firebase, JPA/Hibernate

EXPERIENCE

MAIS Solutions LLC
Volunteer Full-Stack Developer

Jun. 2025 – Sept. 2025
Remote

- Developed authentication and application workflows using Python/Flask, HTML/CSS/JavaScript, and database-backed services.
- Migrated authentication and dynamic data to Firebase BaaS and validated registration, login, verification, and authenticated-access workflows.

PROJECTS

Navy PPBS Decision Intelligence

Oct. 2, 2026

Palantir Foundry, AIP, FDE, Ontology, Workshop

Accenture Federal Services Builder Event

- Selected as **1 of 40 participants from approximately 200 applicants**; led product direction and final presentation for a **4-person team** building a Navy PPBS decision-support application.
- Used **AIP Assist/FDE** to accelerate cleaning and transformation of multi-source budget, obligation, contract, vendor, and program data into Foundry pipelines and Ontology objects.
- Built a **Workshop + AIP Logic** workflow with program filtering, financial visualizations, KPI views, and LLM-generated, evidence-grounded Program Manager decision briefs.

Invisible CAPTCHA Engine: Behavioral Bot Detection

Aug. 2025 – May 2026

Python, Flask, REST APIs, AWS EC2, Git

1st Place GMU Capstone

- Led backend API integration and AWS architecture across a **6-engineer team**, designing how application components communicated with the behavioral bot-detection workflow.
- Proposed a structured JSON-based API workflow for packaging behavioral signals and collaborated with teammates to integrate the Flask backend with the detection model.
- Architected EC2-hosted application components and VPC security controls for a system achieving **93%** bot-detection accuracy with sub-50ms response times.
- Presented architecture, technical progress, and design decisions to faculty sponsors and competition judges, contributing to a **1st Place** finish in the GMU Senior Capstone Competition.

Secure Cloud-Hosted Java Application

May 2026 – Jun. 2026

Java, Spring Boot, REST APIs, MySQL, JPA/Hibernate, AWS RDS, EC2

Personal Project

- Developed Spring Boot REST endpoints and CRUD workflows backed by MySQL on Amazon RDS using Spring Data JPA/Hibernate.
- Deployed on EC2, restricted RDS connectivity with VPC security-group rules, and served the application through Nginx.
